Interview: The Future of Healthcare After the Election

Health care is shaping up to be one of the top issues of the 2020 presidential race. And with tens of thousands of Americans losing their health insurance to a coronavirus-induced recession, fears of inadequate or nonexistent health care coverage have never been greater. People ask, "Where am I going to get health insurance and how much is it going to cost me?" Each presidential candidate offers a very different view of the future of healthcare. President Trump promised to "come up with a great health plan," one that would repeal the Affordable Care Act but replace it with something better while maintaining its biggest selling point: protecting people with pre-existing medical conditions. Joe Biden is pushing to build and expand on the Affordable Care Act. As for the COVID pandemic, Biden's proposals emphasize the role of the federal government leading the response, while Trump has delegated much to the states. What's in store for the future? Join MIT's Jonathan Gruber, Professor of Economics, for an interview on the Future of Healthcare After the Election.

Randall Wright  
Program Director, [MIT Corporate Relations](#)

Randall Wright  
Program Director  
[MIT Corporate Relations](#)

Randall S. Wright is a program director with MIT's Industrial Liaison Program. He manages the interface between the managements of companies, headquartered in the United States and Europe, and the senior administration and faculty of MIT.

As a program director for MIT, he convenes teams of researchers and faculty members to provide on-going emerging technology intelligence and strategic advice for the world's leading technology companies. He is a sought-after speaker, delivering keynote speeches focused on emerging technology opportunities and challenges, and counter-intuitive insights in executive panels and discussions. Randall draws on extensive experience advising executives on a range of emerging technology areas including digital transformation, big data, robotics, green buildings, water efficiency, energy storage, biofuels, advanced materials, and manufacturing. He provides navigation and recommendations on the emerging technologies and adoption landscapes critical to future business growth, as well as creation, development, and execution of programs of research between industry and MIT.

Randall has been bestowed by Federal President of Austria Dr. Heinz Fischer with the decoration Cross of Honor in Gold for Services to the Republic of Austria for his "outstanding contribution to the development of relations between Austria and MIT".

Prior to MIT, Randall was a marketing manager for Pfizer, Inc., a major U.S. pharmaceuticals company. He was also a strategic planning analyst for Pennzoil Company-- a Fortune 500 oil and natural resources company. Randall is an invited lecturer at Northeastern University's Executive M.B.A. Program where he lectures on innovation and corporate strategy. His column Innovation Counterculture looks at ideas and perspectives on strategy, organization, and thinking to help executives connect to the world of innovation outside their organizations and he is published regularly in Research-Technology Management, the award-winning journal of the Industrial Research Institute.
